

2025 CROP BIOSTIMULANT LANDSCAPE

nutrient uptake & plant vigor

nutrient uptake & soil health

plant growth promotion

This landscape maps companies developing biostimulants for commercial food crop production based on publicly available information. It is representative but not comprehensive. Companies appear once, although some offer products in multiple segments. Most of those firms are found in Substances, Microbials or Mixed Portfolios. Ovals without icons represent related segments not considered biostimulants. Please refer to our 2024 BioControl Landscape for companies offering biologicals targeting crop pests.

nutrient availability & uptake (biofertilizer)
